

Out of an abundance of caution, Valley is restricting regular in person visitation effective August 9, 2021. The current county positivity rate is 16.85% which places our residents at risk for being exposed to COVID.

Each Monday morning the county positivity rate will be evaluated with the goal of reopening to in person visits when it is less than 10%.

Remember, you may do window visits, facetime, phone calls and other means of video communication. Please contact the facility to set up video chats with your loved one.
